## Hybrid participation

Hybrid participation will be facilitated using Zoom. All participants - both remote and in-person - will need to install their client, and make sure that it is updated to the latest version. We recommend that remote participants join with a good quality headset with microphone, plenty of screen space (either using a large monitor or second screen), a

normally reliable WiFi signal or wired connection, and a quiet room where you are less likely to be disturbed (but we understand this might be difficult).

Transcription and captioning will be provided using Zoom and Otter.ai.

A CW26 Slack workspace will be available for participants to connect, engage in discussion, ask questions, and forge new collaborations. These conversations can persist long after the Zoom room has closed.
